SUBACUTE CARE	none available
LONG-TERM CARE	2 assisted living facilities
SKILLED NURSING HOME	none available
BOARD AND CARE	none available
HOME HEALTH SUPPORT	waiting lists

ISSUES IN HEALTHCARE PLANNING ON THE COAST

COORDINATION OF PROVIDERS AND PROVIDER GROUPS—cooperation among providers and provider groups (eg, Sutter, Kaiser, Stanford) to provide coordinated care on the coast.

INSURANCE COVERAGE—multiple payers and multiple payment models
Well over half of residents have either Kaiser, Medicare or Health Plan of San Mateo
Need to ensure that services are available regardless of insurance plan

TECHNOLOGY—communication regarding a patient's care needs to be shareable across provider groups. For example, lab results need to be available to physicians regardless of where the lab work was done.

ACCEPTANCE BY THE COMMUNITY—Services should be in a predictable environment that inspires confidence and trust and they should be used often enough to make the providers want to continue their investment
